## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a transducer diaphragm, classified in class 181, subclass 167.
- II. Claims 14-23, drawn to a transducer backplate, classified in class 381, subclass 174.
- III. Claims 24-54, drawn to an electret sound transducer, classified in class 381, subclass 191.
- IV. Claims 55-74, drawn to a method of fabricating, classified in class 216, subclass 2.

1. The inventions are distinct, each from the other because of the following reasons:

Invention of groups I, II and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, Groups I and II may be fabricated by a different process.

2. The Inventions of Groups I, II and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed

Art Unit: 2643

does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the electret sound transducer of Group III, does not require to particulars of Groups I or II. Groups I, II and III, each have separate utility.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; because the search required for Group I is not required for Group II, and the same applies to subsequent claim groupings; and because these inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

### ***Conclusion***
